Exercise 9 - SQL Fundamentals (SELECT & FILTERING statements)

Query 1:

```
SELECT *
FROM employees;
```

Query 2

```
SELECT DISTINCT department
FROM employees;
```

Query 3

```
SELECT first_name,
       last_name,
       salary
FROM employees
ORDER BY salary DESC;
```

Query 4

```
SELECT first_name,
       last_name,
       salary AS highest_paid
FROM employees
ORDER BY salary DESC
LIMIT 5;
```

Query 5

```
SELECT first_name,
       last_name,
       department
FROM employees
WHERE department = 'IT';
```

Query 6

```
SELECT first_name,
       last_name,
       department,
       salary
FROM employees
WHERE department = 'Finance' AND salary > 58000;
```

OR

```
SELECT *
FROM employees
WHERE department = 'Finance'
AND salary > 58000;
```

Query 7

```
SELECT *
FROM employees
WHERE department = 'HR' OR department = 'Marketing';
```

Query 8

```
SELECT *
FROM employees
WHERE NOT department = 'IT';
```

Query 9

```
SELECT *
FROM employees
WHERE department IN ('HR', 'IT', 'Finance');
```

Query 10

```
SELECT *
FROM employees
WHERE department = 'IT' AND salary > 50000 AND city = 'NEW YORK';
```

Query 11

```
SELECT first_name,
       last_name,
       department,
       salary
FROM employees
WHERE department IN('Finance','marketing') AND salary>52000
ORDER BY salary DESC;
```

Query 13

```
SELECT *
FROM employees
WHERE NOT department='Finance' AND salary>50000
ORDER BY hire_date ASC;
```

Query 14

```
SELECT *
FROM employees
WHERE city IN('Chicago','Los Angeles') AND department IN('IT','Marketing');
```
